DETAILED ACTION

And

NOTICE OF ALLOWANCE

1. **Claims 1-3 and 5-17** are Allowed.

Examiner's Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The following limitations, in combination with other limitations are neither anticipated nor made obvious by the prior art. "*An apparatus for creating a protocol stack*" in combination with "*a local emulation manager that is assigned to the protocol layer and a global emulation manager that is linked to the local emulation manager.*" The Examiner notes that this express combination of limitations is neither anticipated nor made obvious by the prior art.

As regards independent claim 16 the following limitations, in combination with other limitations are neither anticipated nor made obvious by the prior art, "*making available a protocol layer with a standardized interface*" in combination with "*randomly compiling the protocol stack containing the protocol layer*". It is noted by the Examiner that the expressly claimed limitation of the protocol stack being "*randomly*" compiled is interpreted to mean that the protocol stack is compiled in a *non-deterministic* manner, and not the result of any selected combination of protocols but as the result of compiling the stack. The Examiner notes that the Applicants' have argued that their *protocol layer* has a *standardized interface*, which differs from the interface disclosed by the cited prior art references, *see the 12/6/2004 responses*.

Art Unit: 2123

As regards independent claim 17 the following limitations, in combination with other limitations are neither anticipated nor made obvious by the prior art, *a plurality of local emulation managers, each local emulation manager being coupled to a protocol layer emulation with the protocol layer emulation having a standardized interface;*” in combination with, *“a global emulation manager linked to the local emulation managers to form an administration instance”*.

2.1 Dependent **Claims 2, 3 and 5-15** are allowed as they depend from an allowed base claim.

2.2 Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent 6,081,836 discloses an emulation manager, however, it does not disclose an apparatus or method of creating a protocol stack.

3.1 Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dwin M Craig whose telephone number is (571) 272-3710. The examiner can normally be reached on 10:00 - 6:00 M-F.
